

BIOLOGICAL & PLANT STIMULANTS

TSUNAMI[®] COMPLETE

TSUNAMI[®]

COMPLETE

World Class Wetting Agent

A complexed Block Co-Polymer Surfactant with added Humic acid. Assists in treating hydrophobic soil and LDS problems with ingredients designed to reduce recurrence.

Tsunami Complete is a Greens-grade moisture and dew controller that shows excellent water holding properties and is particularly helpful in sand and low CEC soils.

It works to draw moisture down from the surface, distribute it through the profile and enhance retention in the rootzone by bonding water droplets with soil exchange sites.

APPLICATION RATES

Preventative application on Hydrophobic soil or Localised Dry Spot in Sports Fields, Fairways, Greens & Tees 20-50 litres per hectare or as advised. Apply with 400 litres of water or more. Irrigation is recommended for optimum effectiveness. Repeat monthly or as required Spring - Autumn.

Curative application on Hydrophobic soil or Localised Dry Spot (Greens, Tees, Fairways & Sports Fields) 50 litres per hectare or as advised. Apply with 400 litres per hectare of water or more. Irrigation is recommended for optimum effectiveness. Repeat as required.

Dew Control 20-50 litres per hectare or as advised. Apply on the day or one day prior to event to help prevent dew formation. Irrigation is not critical but best results will be obtained by following application with 4-6mm water.

Store in a cool place away from sunlight Stir well before use

TYPICAL ANALYSIS

Major Elements	w/v%
Proprietary Surfactant Blend	95.0%
Humic Acid	5.0%
