BIOLOGICAL

MYCRO-TEC

SP

MYCRO-TEC SP

An inoculum of blended biologicals of two different beneficial micro-species including Bacillus Amyloliquefaciens and Trichoderma Harzianum containing up to 10 billion microorganisms per mL of liquid! These organisms provide competitive exclusion of other pathogenic organisms and encourage more vigorous root systems

Key Benefits

Biological: Stimulates enzymes; Acts as an organic catalyst; Encourages soil microorganisms; Increases root respiration and formation; Increases plant membrane permeability; Increases nutrient translocation.

Mineral: Increases soil cation exchange capacity; Improves buering capacity; Rich in organic & mineral substances; Retains water soluble fertilisers in soil. Has specific Phosphorus, Potassium, Zinc and Nitrogen solubilising biology, giving you access to the soil nutrient bank and increasing plant nutrient availability.

Physical: Improves friability of soil; Improves soil aeration; Increases water holding capacity; Reduces soil erosion.

HORTICULTURE APPLICATION RATES & DILUTION RATE

Foliar

1-10 litres per hectare or as advised

Dilution rate

1:20 or as advised

BROADACRE APPLICATION RATES & DILUTION RATE

1-5 litres per hectare or as advised

Dilution rate

1:20 or as advised

TYPICAL ANALYSIS

Major Elements	w/v%
Ave. Concentration	10 ⁹ cfu/G

**Store in a cool place away from sunlight
Stir well before use**
