

HYBRID  AG

PLANT STIMULANT

# ECO-GIBB®

HORTICULTURE

# ECO-GIBB<sup>®</sup>

**Eco-Gibb is an extremely efficient and highly concentrated state-of-the-art plant growth regulator with proved benefits all over the world.**

Hybrid-Ag's Eco-Gibb 400SG (soluble granule) formulation has many benefits including:

- One of the most concentrated formulations on the market
- Improved solubility
- Improved uptake and absorption
- Convenient to handle, transport and store
- Very stable over time, even in a wide range of temperatures

Eco-Gibb can be used in many and varied situations to improve increased cell expansion, which provides an increase in fruit size, firmness and quality.

It is also essential in providing greater fruit set and higher yields in many crops.

Eco-Gibb 400SG is used extensively in table grapes to enhance elongation and increase light penetration.

## Fruit Specific Benefits:

### Table Grapes:

- Elongates and loosens clusters to enhance air circulation and light penetration
- Decreases berry set, reduces thinning costs
- Increases berry size and quality

### Citrus:

- Increases fruit set and yield
- Delays rind aging
- Reduces physiological disorders
- Delays maturity for a more orderly harvest

### Cherries:

- Increases fruit size
- Improves fruit firmness and quality
- Delays maturity for a more orderly harvest

### Pears:

- Increases fruit set and yield

## APPLICATION RATES

### Foliar

25-250g per hectare or as advised. Actual rates and applications vary depending on crop type and canopy size. Please consult your agronomist for final rates for crops

### Dilution Rate

2.5g product per 100Litre = 10ppm or as advised

**Store in a cool place away from sunlight. Stir well before use.**

## TYPICAL ANALYSIS

Major Elements	(w/v%)
Potassium	0.0%
Sulphur	0.0%
Carbon	0.0%
