OPTI-TRACE[®]
BORON ORGANIC

BROADCAST

OPTI-TRACE®

BORON ORGANIC

A premium class-leading multi-chelate Boron trace element utilising the combined strengths of multiple natural chelation methods to create an extremely efficient liquid trace element delivery for optimum nutrient uptake and translocation.

Opti-Trace® Boron Organic combination of uses amino acid chelates, advanced fulvic acid extracts and saponins, to deliver more of the applied trace element to the plant in a form that is perfectly compatible to processes. Individually, plant's each of these ingredients are also very useful plant stimulants, microorganism food sources or both.

As with our entire trace element range, combining a diverse combination of micro-nutrients and plant stimulants creates a unique synergy - where all the components together give a greater result than any one would give if applied individually.

Why is Boron so important?

- Boron is involved in the usage and efficiency of Calcium
- Required for movement of sugars through the plant
- Essential for cell division

APPLICATION RATES

0.1L - 2.0L/Ha depending on product and growth stage of the crop

Dilution Rate

1:20 or as advised

Store in a cool place away from sunlight. Stir well before use.

NASAA Organic Certified 3620M.
