BIOLOGICAL

MYCRO-FEAST ORGANIC

MYCRO-FEAST ORGANIC

A real smorgasbord of fungal and bacterial foods. The greater the diversity of food sources for microbial life the wider the variety of beneficial microbes that can breed. Mycro-Feast is a balanced blend of fungal and bacterial foods providing maximum but even diversity of microbial growth.

Benefits

Biological: Stimulates enzymes; Acts as an organic catalyst; Encourages soil microorganisms; Increases root respiration and formation; Increases plant membrane permeability; Increases nutrient translocation.

Chemical: Increases soil cation exchange capacity; Improves buffering capacity; Rich in organic and mineral substances; Retains water soluble fertilisers in soil.

Physical: Improves friability of soil; Improves soil aeration; Increases water holding capacity; Reduces soil erosion.

HORTICULTURE APPLICATION RATES & DILUTION RATE

Watered in

2-5 litres per hectare or as advised

Dilution rate

1:50 - 1:200 or as advised. Use maximum practical water rates. Add to water and for best results mix with equal parts of Mycro-Start as a microbe source

BROADACRE APPLICATION RATES & DILUTION RATE

4-10 litres per hectare or as advised

TYPICAL ANALYSIS

Major Elements	w/v%
Nitrogen	2.9%
Sulphur	1.5%
Potassium	1.2%
Calcium	1.1%
Phosphorus	0.5%

Store in a cool place away from sunlight
Stir well before use

NASAA Organic Certified 3620M.
