AGRI-VIVE®

0:0:30

Agri-Vive 0:0:30 is a premium quality, world-class, liquid fertiliser, using cutting edge technology to create a unique fusion between high potency N:P:K liquid and a broad spectrum of 'active carbon' organic ingredients. Hybrid-Ag has created a very special, biologically buffered plant nutrient liquid.

We begin with a base of ultra-concentrated, pH balanced 'hot mix' N:P:K liquids, manufactured in a controlled reaction between pure, technical grade ingredients.

This pure base is then reacted with unique Heptonate Chelators and Fulvic acids, a process which binds the pure N:P:K liquids into complex carbohydrate chains. Through this process these essential plant nutrients are complexed in an organic sugar alcohol chelate to create a highly efficient liquid fertiliser.

This complexing totally alters the way the nutrients react, making their uptake far more efficient as well as eco-friendly.

APPLICATION RATES

Foliar

2-10 litres per hectare or as advised

Watered in

10-40 litres per hectare or as advised

Dilution rate

1:20 or as advised

**Store in a cool place away from sunlight
Stir well before use**

NASAA Organic Certified 3620M.

TYPICAL ANALYSIS

Major Elements	w/v%
Nitrogen	0.0%
Phosphorous	0.0%
Potassium	30.0%
Fulvic Acid	1.0%
Carbon Chelators	10.0%
