## Combat Grass Tetany with Protex GTM

Protex GTM can be applied as a spray on hay and silage where the rate is 1L/50m<sup>2</sup> or in a trough for adlib consumption

Protex GTM is a tasty treat for animals, the sugar syrup and salt ensure extra energy to overcome the cold weather and struggling pasture with the calcium and magnesium providing protection from disease.

The liquid application to fodder ensures the stock can't remove the nutrition and the sweet saltiness improves the energy of the fodder.

This product is locally produced in Wangaratta and is available in 20L, 200L and 1000L IBC.

Not for human consumption.

## APPLICATION RATES

### Spray

20 litre per Silage Roll or as advised

**Store in a cool place away from sunlight  
Stir well before use**

## TYPICAL ANALYSIS

Major Elements	w/v%
Calcium	7.0%
