MACRO-NUTRIENTS RANGE

NUTRI-CORE
SOIL ACTIVATOR

NUTRI-CORE SOIL ACTIVATOR

A premium liquid fertiliser that provides efficient delivery of nitrogen and sulfur to the plant with the added benefits of fulvic acid.

Nutri-Core Soil Activator provides a source of both Nitrogen and Sulfur, and can induce a pH shift in the rhizosphere, to assist in lowering pH levels for increased uptake of trace elements.

Nutri-Core Soil Activator solubilises Calcium and Trace Elements around the root zone, for increased availability to the plant.

CSIRO research has shown that the materials utilised in the Nutri-Core Soil Activator formulation are very effective at solubilising Calcium in the soil profile.

Nutri-Core Soil Activator contains a fruiting(reproductive) form of Nitrogen in the form of Ammonium, coupled with Sulfur which is also a fruiting element.

Use in deciduous crops coming out of dormancy to provide a Calcium boost, also effective for use in high pH soils.

APPLICATION RATES

Foliar
N/A

Watered in
30-80 litres per hectare or as advised

Dilution rate
1:5 or as advised

**Store in a cool place away from sunlight
Stir well before use**

TYPICAL ANALYSIS

Major Elements	w/v%
Nitrogen	11.5%
Sulfur	12.3%
Fulvic Acid	5.0%
