MACRO-NUTRIENTS RANGE

POWER-CAL ORGANIC

Power-Cal Organic is based on the world's best and latest Calcium Technology for plants. Essential plant nutrients are complexed in chelated forms to create a highly efficient foliar fertiliser. The small molecular size and delivery package containing natural chelators as well as carbohydrate compounds ensures that the nutrient is delivered in the best possible manner.

Calcium is a relatively immobile element in plants and this causes some well-known disorders. Power-Cal Organic is specifically designed to provide Calcium to plants in an organic form in the most efficient way possible. Power-Cal Organic's chelation assists the Calcium ion to move into the plant and move towards the growth forming locations, and fruit forming tissue.

Features of Power-Cal Organic:

- Builds tissue Calcium levels, improving disease resistance and drought tolerance
- Improves cell structure
- Improves overall quality, weight and texture
- Eliminates hidden Calcium deficiencies and hunger signs
- Contains 100% plant available nutrients utilising the Power-Cal delivery system.

- Contains leaf penetrants and translocation aids to enhance root and foliar uptake
- Does NOT contain chlorides which can cause serious leaf injury
- Rapidly absorbed into the plant

Calcium aids in the formation and strength of cell walls and is necessary for the development of plants. It is also required for early root growth and strong new top growth.

APPLICATION RATES

Foliar / Watered in

4-10 litres per hectare or as advised

Dilution rate

1:20 or as advised

Store in a cool place away from sunlight.

Stir well before use.

NASAA Organic Certified 3620M.

TYPICAL ANALYSIS

Major Elements	%w/v
Calcium	6.3%
Boron	0.1%
Liquid Kelp	1.5%
Fulvix	7.5%
Carbohydrates	17.5%
