## OPTI-TRACE

## BUD MAX ORGANIC

**A premium class-leading multi-chelate Bud Max Organic is a trace element pack utilising the combined strengths of multiple natural chelation methods to create an extremely efficient liquid trace element delivery for optimum nutrient uptake and**

Bud Max Organic uses a complex combination of amino acid chelates, advanced fulvic acid extracts and saponins, to deliver more of the applied trace elements to the plant in a form that is perfectly compatible to the plant's biological processes. Individually, each of these ingredients are also very useful plant stimulants, microorganism food sources or both.

As with our entire trace element range, Bud Max Organic is a diverse combination of micro-nutrients and plant stimulants which together create a unique synergy - where all the components together give a greater result than any one would give if applied individually.

Opti-Trace® Bud Max Organic is a premium blend of chelated boron, manganese, iron, zinc and molybdenum.

This blend is specifically designed to provide a complete package of trace elements which are essential for bud development and flowering optimisation. Bud Max Organic has been created as an all-in-one liquid blend to simplifying the pathway to improved fruit-set for growers.

## APPLICATION RATES

**Foliar**

1-5 litres per hectare or as advised

**Watered in**

5-10 litres per hectare or as advised

**Dilution rate**

1:20 or as advised

**Store in a cool place away from sunlight**

**Stir well before use**

## TYPICAL ANALYSIS

Major Elements	%w/v
Manganese	5.3%
Zinc	2.2%
Sulfur	2.5%
Boron	1.6%
Iron	0.1%
Molybdenum	0.2%
Carbohydrates	12%
